Westward trains will use track No. 1, Rio Grande Division, Mescal to Tucson, and eastward trains will use track No. 2, Tucson Division, Tucson to Mescal, unless otherwise directed by train order.

All trains will move with caution between west yard limit and east switch Fairbank.

Trains to and from Benson-Fairbank Branch may move under block signal indication between east switch Fairbank and Benson Jct. after receiving authority from train dispatcher to occupy main track. Eastward trains on Benson-Fairbank Branch must not pass block signal 10464 on branch or foul main track until authorized by train dispatcher. Normal position and/or indication of signal 10464 will be Stop, except when main track switch Benson Jct. is lined for Benson-Fairbank Branch, block signal 10464 will then indicate Proceed if block protected by signal 10464 is not occupied. Benson-Fairbank Branch trains must avoid delaying main line trains and must not pass block signal 10464 for eastward trains, or signal 10477 for westward trains, if in other than Proceed position, except as provided by Rule 99.

Trains except first class, must move with caution between Douglas and west switch Calumet and look out for yard engines occupying main track.

ADDITIONAL FLAG STOPS TO RECEIVE OR DISCHARGE REVENUE PASSENGERS

Between yard limit board East of Alamogordo Junction and connection between main track and siding located east of Alamogordo station, trains to and from the Cloudcroft Branch may move under authority of block signals only.

All trains must move between these points prepared to stop expecting to find main track occupied.

Cloudcroft trains must avoid delaying main line trains and should when practicable move through Alamogordo siding instead of through the connection.

First class trains meeting at Alamogordo will use that portion of the siding between the East and West connections just east and west of station and time table schedules and train orders applicable between first class trains only will apply at these connections.

SPECIAL INSTRUCTIONS

RULE 2. Watch Inspectors:

S. A. Pope, Manager of Time Service, 65 Market St., San Francisco.

El Paso	B. R. Benjamin, 212 Mills St.
El Paso	Art Kassel, 910 No. Piedras St.
Tucson	Greenwald & Adams
Tucson	H. L. Tucker
Douglas	Hoyal Jewelers
Bisbee	L. L. Gilman
Lordsburg	H. H. Conder
Alamogordo	A. Sorenson & Son
Tucumcari	E. E. Rivers

RULE 14 (d). As specified below, four long and one short sounds of whistle will be indication that flagman may return from West as prescribed by Rule 99:

Mescal, Trains on Mescal Subdivision.
Anapra, Trains on Hachita Subdivision.

RULE 14 (e). As specified below, six long sounds of whistle will be indication that flagman may return from East as prescribed by Rule 99:

Mescal, Trains on Mescal Subdivision.
Anapra, Trains on Hachita Subdivision.

RULE 21 (c). Engines of trains may display indicators from El Paso Union Passenger Depot:

Westward to Anapra,
Eastward to Octavia St.

RULE 30.

Curtiss: Whistle signal must be sounded and bell kept ringing approaching and over crossing near Apache Powder Co. office, and movements over highway crossing on spur leading to plant must be preceded by flagman.

Smelter: On main lead in lower yard whistle must be sounded and bell kept ringing aproaching and over crossings at the east and west ends of converter building.

RULE D-71. Trains may move between Anapra and El Paso (Octavia St.) with the current of traffic irrespective of time table superiority but must avoid delaying passenger trains.

RULE S-72. Westward trains are superior to trains of the same class in the opposite direction.

RULE 83. Eastward trains of the Hachita subdivision may move Anapra to El Paso with current of traffic as authorized into Anapra.

RULE 83 as it applies to passing from double to single track is modified. If identification of trains on double track is made between El Paso Union Passenger Depot and Octavia Street, T&NO Yard, it will not be necessary to obtain a train order check of the same trains before passing from double to single track. Trains may identify each other on double track between El Paso Union Passenger Depot and Tower 47.

RULE 83 (A). At the following stations only trains originating and terminating will register:

Fairbank
Bisbee Jct.
Vaughn
Tombstone
Benson
Alamogordo

All trains operating over branch lines arriving or departing Fairbank will register at Fairbank.

RULE 83 (B). At open train order offices trains may register by ticket as follows:

Mescal, All trains.
Anapra, All trains.

El Paso (Octavia St.) Trains that do not originate or terminate at El Paso (Octavia St.) and pass that point.

Trains the schedule of which terminates at El Paso Union Passenger Depot, register by ticket in addition to complying with Rule 83 (A).

Trains leaving El Paso Union Passenger Depot show time of departure on bottom of ticket left at Anapra or El Paso (Octavia St.).

RULE 83 (D). Will not apply at Tombstone or at Fort Huachuca.

Westward trains leaving El Paso (Octavia Street) routed via Anapra and Hachita Subdivision must obtain two clearances, one marked Deming Subdivision and one marked Hachita Subdivision.

Eastward trains of the Hachita subdivision may leave Anapra without a clearance and will be governed by train order signal.

Trains originating at El Paso Union Passenger Depot will proceed westward to Anapra or eastward to El Paso (Octavia Street), where they will obtain a clearance and, when necessary, check of trains. Sections of Westward schedules and Westward extra trains originating at El Paso Union Passenger Depot must obtain train orders at Anapra, and sections of Eastward schedules and Eastward extra trains must obtain train orders at El Paso (Octavia Street) for movement beyond those points.

RULE 93. Yard limits are established at:

Tucson
Benson
Curtiss
Patagonia
Sonoita
Fairbank
Ft. Huachuca
Bisbee Jct.
Douglas
Hachita
Columbus
Valedon
Lordsburg
Duncan
Clifton
Deming
El Paso
Alamogordo
Cloudcroft
Russia
Carrizozo
Capitan
Vaughn
Santa Rosa
Tucumcari
Roy
Lloyd-French
Dawson

Yard limits are defined at the following points by yard limit signs:

Fairbank	Main Track, MP 1046.32 and MP 1049.36. Benson Branch, MP 1050.81. Patagonia Branch, MP 1052.32. Tombstone Branch, MP 1049.42.
Bisbee Jct.	Main Track, MP 1084.27 and MP 1085.78, and includes all of Bisbee Branch and Bisbee-Lowell cut-off.
Lordsburg	Main Track, MP 1147.19 and MP 1151.38. Clifton Branch, MP 1148.04. Valedon Branch, MP 1148.38.
El Paso	Track No. 1, MP 1291.54, Track No. 2, MP 1319.87. Alamogordo subdivision, MP 1300.54.
Alamogordo	Main Track, M. P. 1381.47 and MP 1385.06, including wye on Cloudcroft Branch.
Carrizozo	Main Track, MP 1438.22 and MP 1441.90, Capitan Branch, MP 1441.00.

RULE 95. The number of sections of a schedule, if any, to be run out of El Paso Union Passenger Depot will be arranged by Chief Train Dispatcher and signals will be displayed to Anapra or to El Paso (Octavia Street) according to instructions.

RULE D-97. (A). Extra trains may leave El Paso Union Passenger Depot as directed by Chief Train Dispatcher.

RULE 98. Railroad crossings at grade not interlocked:

Lowell:

Phelps Dodge Mining Co. narrow gauge track from Junction Shaft to Campbell Shaft crossings at following locations:

Fixed crossing on loading tracks 1 and 2 at tipple, Junction Shaft.

Movable crossing on track leading to Denn Mine 20 feet west of Naco Highway crossing.

Movable crossing on Campbell Shaft loading track 240 feet west of Naco Highway crossing.

Movable crossing on Campbell Shaft lumber spur 190 feet west of No. 1 loading track switch.

The movable type crossings are narrow gauge turn-back rails, normal position locked and clear of Southern Pacific tracks when not in use. See that turn-back rails are in normal position clear of S. P. tracks and crossing clear of obstructions before operating over crossing location. "STOP" signs are installed on each side of locations designated. Crews operating over tracks in these locations, protect against impaired side clearances, and stop before crossing these locations.

AT&SF Ry. at Colfax is protected with gate, normal position of which is located across AT&SF track. Approach this crossing with caution.

RULE 99. At Fairbank trains from Patagonia Branch must not occupy main track between N. M. & A. Jct. and station, except under protection of flag.

RULE 103 (A). In general, highway crossing signals are so designed that they will not operate for trains or engines making a reverse movement after having passed over the crossing. Trains or engines making such reverse movements must protect the crossing unless it is known that signals are operating.

RULE 104. The normal position of switches at the end of double track and at junctions will be as follows:

Bisbee Jct.	East leg of wye is main track of Bisbee Branch.
Corta	Junction switch is for Bisbee-Lowell cut-off via Warren.
Don Luis	East and west wye switches for Don Luis yard.
Valedon Branch	East end, MP 1147.75, for Oil Siding.
Anapra	East end of west crossover and west end of east crossover, for main track Deming subdivision. These are hand-throw switches and will be handled by operator, Anapra.
	West end west crossover, for Track 2. This is an oil buffer spring switch.
	East end east crossover, for Track 2. This is an oil buffer spring switch.
Alamogordo Jct.	Wye, Cloudcroft end, for east leg.
Toboggan	When cars are left on either end of switchback, lined and locked at east and west ends of switchback for westward trains.
Carrizozo Jct.	Wye, Capitan end, for west leg.
Pastura	West switch of turnout from siding to Main Track, near water tank, is lined and locked for stock track.
Tucumcari	Initial switch Dawson Branch, for stock track.

DERAILS MAIN TRACK

Benson Branch- Benson Jct.	284 ft. west of head block.
Patagonia Branch- Fairbank	260 ft. east of N. M. & A. Jct.
Tombstone Branch- Fairbank	300 ft. east of Junction switch.
Ft. Huachuca Branch- Lewis Springs	237 ft. east of Junction switch.
Bisbee Branch-Bisbee	225 ft. west of station.
Valedon Branch- Lordsburg	295 ft. east of Junction switch.
Cloudcroft Branch- Alamogordo Jct.	East leg of Wye-427 ft. east of main track switch. West leg of Wye-192 ft. east of main track switch.
Cloudcroft	150 ft. west of west wye switch.
Russia	837 ft. west of west switch.
Capitan Branch- Carrizozo Jct.	West leg of Wye-283 ft. east of main track switch. East leg of Wye-160 ft. east of main track switch.
Dawson Branch- Dawson Yard	550 ft. west of west switch.

RULE 105. Following tracks are designated for use as sidings:

Lewis Springs	Siding located east of station on North side of main track.
Hereford	Siding located opposite station on North side of main track, extending eastward from turnout east of stock pen.
Naco	Siding located east of station on South side of main track.
Hachita	Siding is on South side of main track. East switch located 200 feet east of coal chute, west switch 200 feet west of wye switch.
Pastura	Siding located opposite station on South side of main track, extending westward from turnout. Initial switch located 400 feet east of station building.

RULE 206 (A). Regular trains will not be required to obtain clearance at the following stations:

Patagonia
Ft. Huachuca
Tombstone
Russia
Capitan

RULE 221. Trains must obtain clearance before leaving Deming.

No. 975 must obtain clearance before leaving French.

The light will not be displayed in train order signals at following stations except when train orders are to be delivered:

Curtiss
Duncan
Mosquero
Roy

RULE 221 (A). It is unnecessary for dispatchers to O. K. a clearance and operators to transmit the address and order numbers from clearance to the train dispatcher, unless requested to do so by train dispatcher, nor will they complete that portion of clearance reading:

"OK at..................M..................Chief Train Dispatcher," all provided that said orders affect movement of a train wholly within block system or signal dispatching limits.

If the orders affect movement, either wholly or in part, outside of the block system or signal dispatching limits, operators must repeat address and order numbers and obtain dispatcher's OK before the orders are delivered.

RULE 667. Boiler blow-off cocks on engines must not be opened while passing over steel bridges.

RULE 825. Outfit cars must not be left in front of warehouses, storehouses, lumber yards, or other buildings.

Instructions for setting hand brakes at:

El Paso, T&NO Freight Yard: Engine must not be cut off freight trains when train or part of train is left west of Octavia St. until five or more hand brakes have been set on east end of train, or that part left west of Octavia St.

Hand brakes on freight trains must be set with the assistance of a brake club after train has stopped. Any employee releasing any of these brakes, must set as many others to replace them.

On Cloudcroft Branch and Capitan Branch, cars must not be cut off while in motion or before hand brakes have been set.

RULE 831. The term "wooden frame outfit cars" includes wooden superstructure outfit cars with steel underframe.

RULE 836. If it can be avoided engines must not push trains between Bisbee Junction and Don Luis.

AUTOMATIC BLOCK SYSTEM

Tracks not protected by automatic block signals are located and described as follows:

EL PASO: (1) Pacific Lines Tracks Nos. 1 and 2 and T. & N. O. Tracks Nos. 1 and 2 and Pacific Lines main track (former E. P. & S. W. tracks) between interlocking home signals west of Interlocking Station, Tower No. 6, governing the movement of eastward trains, and interlocking home signals east of Interlocking station, Tower No. 47, governing the movement of westward trains.

(2) Tracks within the limits of the El Paso Union Passenger Depot Company's yard.

Signals displaying indication in both upper and lower quadrants are in service.

Upper Quadrant: Signal arm extended upward parallel to signal mast—"PROCEED."

RULE 509. A train or engine, when backing out of a siding or other track in block system limits, will, unless backed to clear block signal, proceed as if signal be in "Stop" position.

Track No. 1. When a block signal indicates "Stop" trains may proceed as follows:

Mescal to Tucson: Westward trains will be governed by Rule 509 applicable to double track. Eastward trains Tucson to Signal 10078, just east of east switch Empire, will have no block signal protection. From Signal 10078 to Mescal will be governed by Rule 509 applicable to single track.

Tower 6 to Anapra: Westward trains will be governed by Rule 509 applicable to double track. Eastward trains will be governed by Rule 509 applicable to single track.

Track No. 2. Anapra to Tower 6: Eastward trains will be governed by Rule 509 applicable to double track. Westward trains will be governed by Rule 509 applicable to single track.

Caution arm in service on interlocking signal No. 19, located on Track No. 1 east of Interlocking Tower No. 6. This caution arm indicates position of top arm of Signal 8299, located just west of Interlocking Tower No. 6, Track No. 1, indicating a condition affecting the movement of a westward train.

Following block signals have included in their control limits special protective devices. When these signals indicate "Stop", careful inspection must be made of the track and/or structure, as indicated below, and it must be known that they are safe for passage of trains before proceeding:

South Line

Signal 13174, Anapra, oil buffer spring switch.

East Line

Signals 14786 and 14805, Arch 1479.90.

Signals 15836 and 15843, Cuervo Bridge 1584.00 and approaches.

OIL BUFFER SPRING SWITCHES

When a block signal in advance of a facing point oil buffer spring switch indicates "STOP", careful examination of switch must be made before passing over it. When making trailing point movement and train is stopped on switches, a reverse movement must not be made, nor the slack taken until the switch has been thrown by hand. When movement has been completed through switch, reverse movement must not be made until point closes.

Running switches are prohibited and sand, blow-off cocks and injectors must not be used nor boosters started, while passing over these switches.

Switches are located as follows and speed indicated must not be exceeded when passing over such switches:

	MPH
Anapra:	
East switch of east crossover:	
Trailing Eastward	25
Facing Westward	35
West switch of west crossover:	
Facing Eastward	35
Trailing Westward	25
El Paso:	
East end of ice house track:	
Trailing Eastward	25
Facing Westward	15

RULE 511. Within block signal limits after switches of a crossover are thrown wait three minutes before crossing over unless block signals protecting the movement can be seen to be in stop position not less than one-half mile distant.

RULES 512 and 512 (A). Switch indicators and dwarf signals located:

Douglas, East yard entrance switch.
Lordsburg, Valedon Branch Switch.
Alamogordo, East and West legs of wye.
Carrizozo, East leg of wye.

When switch indicator shows block clear, derail and switch may be lined for movement to main track. Signal is normally dark, but when derail is lined, signal will light and indicate "Stop." When derail and switch are both lined and block is clear, signal will indicate "Proceed." When switch indicator shows block occupied derail only may be lined. After waiting two minutes switch may be lined. If signal indicates "Stop" after switch and derail have been lined, train will proceed as prescribed by Rule 509.

At Pastura double switch indicator has been located near derail at east end of stock track and will display clear indication if there be no train occupying block. When derail is set for movement out of east end of stock track, these indicators will assume "Stop" position and remain in that position until east main track switch to stock track has been opened. If there be no train occupying block, indicators will then display a clear indication. Trains and engines using east stock track switch must not pass derail until main track switch has been thrown, or when switch indicators display "Stop" indication, except when protected as provided by Rule 99.

At Lordsburg "Take Siding" indicators installed at east and west ends of yard. These indicators, controlled by Terminal Trainmasters only, are located on mast of Signal 11495, east of Lordsburg, and on mast of Signal 11470, west of Lordsburg, to govern movement of trains at Lordsburg according to Rules 705, 706, 707 and 708.

RULE 516. Overlap posts are located at:

Bowen: 292 feet west of block signal 13194, eastward trains.
18 feet west of block signal 13188, westward trains, track No. 2.

INTERLOCKING

Mescal: Interlocking signals of Rio Grande Division will display indication in upper quadrant. The beginning of Tucson Division single track is at east switch of west crossover. Beginning of Rio Grande Division single track is at east switch of east crossover. Beginning of track 1 of double track is at west end of west crossover.

Limits are between home signals governing east switch of east crossover and west switch of west crossover of the Rio Grande Division, and home signals governing east switches and west switches of sidings of the Tucson Division. Switches are controlled by signal operator, except switch leading from north siding to water and outfit spurs from south siding to both legs of wye and to west end of coal track.

Switch and derail east end coal track are hand-thrown but must not be used until permission is secured from signal operator.

Where hand signals, as prescribed by Rule 628, cannot be seen, trains stopped will call the signal operator and secure permission to proceed; also to throw switches by hand in the event the remote control appliance is inoperative.

Whistle signals as follows:

Eastward trains enroute Tucson Division—two short, one long and two short.

Eastward trains enroute Rio Grande Division—one long and four short.

Eastward trains for south siding—one short, one long and one short.

Eastward trains south siding to Tucson Division—two short, one long and one short.

Eastward trains south siding to Rio Grande Division—one short, one long and two short.

Westward trains north siding to No. 1 track—two long and two short.

Westward trains Tucson Division enroute No. 1 track—one short and two long.

Westward trains Tucson Division enroute north siding—two short and two long.

Westward Rio Grande Division trains enroute No. 1 track—one long, one short and one long.

Westward trains from Rio Grande Division through east crossover and Tucson Division to No. 1 track—one short, two long and one short.

EL PASO — TOWER 6:

(NOTE: Eastward trains: At switch leading to Union Passenger Depot yard, upper arm on signal mast governs route to Union Passenger Depot tracks. Lower arm governs route to T&NO or Pacific Lines freight yard.)

Whistle signals as follows:

Main track movements in either direction with current of traffic—one long.

Main track movements between Pacific Lines No. 2 Track and T. &. N. O. double track in either direction—one short, one long and one short.

Other main track movements in either direction against current of traffic—one short and two long.

T. & N. O. Union Depot connection, from any direction—one long, two short and one long.

Pacific Lines Union Depot connection, from any direction—one long, one short and one long.

Switch west end of ice house crossover is a remote control and operated by signal operator from Tower 6. In event remote control appliance is inoperative, trains stopped will call signal operator by telephone and secure permission to throw switch by hand. Instructions for operating the switch by hand, when so authorized by signal operator, are located in telephone booth.

Switches just east of El Paso Union Passenger Depot yard governing movements into and out of Union Passenger Depot tracks and crossover movements from westward and eastward main tracks Nos. 1 and 2, are operated from Tower 6. Interlocking Signals and Rules govern movements over these switches.

When signals are not cleared or the switch is not set for the route required, communicate with the signal operator at Tower 6 by telephone located in box on westward signal mast at Santa Fe Street, on signal mast near east lead Union Passenger Depot or on iron fence Union Passenger Depot. Instructions for operating the switch by hand, when so authorized by the signal operator, are located in telephone boxes.

When necessary for a yard engine to use a route that has been lined for an approaching passenger train, the signal operator must immediately be so advised by telephone, in order that he may restore the route and clear signals for the passenger train.

The foreman in charge of switching passenger equipment at east end of Union Passenger Depot yard will advise signal operator by telephone when ready to start switching over Union Passenger Depot connection, and signal operator will set this switch and clear signal, leaving same in that position until foreman advises switching has been completed.

Conductors of eastward passenger trains advise signal operator by telephone, located in box on Union Depot fence, when train is ready to leave.

Within the limits of El Paso Union Passenger Depot Company's yard, employes are subject to Rules and Regulations of that Company.

EL PASO — TOWER 47:

Whistle signals as follows:

Main track movements in either direction with current of traffic—one long.

Main track movements in either direction against current of traffic—one short and two long.

North lead, Eastward—one long, one short, one long and one short.

North lead, Westward—one long, one short and one long.

South lead, Eastward—one short, two long and one short.

South lead, Westward—two short and two long.

To T. & P. main track—two short, one long and one short.

Westward to west yard—one short, one long and two short.

To East Yard—two long and two short.

Eastward to West Yard—one short, one long and one short.

To Alamogordo Subdivision from T. & N. O. Yard—one long, two short and one long.

From West Yard to Alamogordo Subdivision—three long and one short.

From Alamogordo Subdivision to T. &. N. O. Yard—one long.

From Alamogordo Subdivision to West Yard—two short, two long and one short.

S. P. Shop Lead Eastward from any point—two short, two long and two short.

S. P. Shop Lead Westward from any point—two short, one long and two short.

S. P. Roundhouse Lead Eastward—one short, two long and two short.

S. P. Roundhouse Lead Westward—two short, two long and one short.

TRAIN AND AIR INSPECTION

On freight trains, when conditions are favorable and in the judgment of conductor and engineer it is safe to do so, run may be made without stopping for inspection from one water stop to the next water stop except that a distance of sixty (60) miles must not be exceeded between inspections, and except freight trains may operate between Ancho and Vaughn, a distance of 61.9 miles.

Inspection must be made at any intermediate stop.

Freight trains on descending grade must stop at least five minutes for inspection at:

Vail Medio High Rolls Walnut
Campstone Campana La Luz

The same inspection as is required of freight trains will be made of engines running light, descending grades of 1½ per cent or over.

AIR BRAKE RULE 2. Enginemen when leaving roundhouse will make running air test, to ascertain if brakes are in operative condition.

AIR BRAKE RULE 4. Westward trains between Mosquero and Campana, and on the Capitan and Cloudcroft Branches must use 90 pounds brake pipe pressure.

AIR BRAKE RULE 11. Air brake inspection at points where no car inspectors are on duty, and motive power and/or engine crew or train crew is changed on a freight train, shall be made as follows:

After train is made up and engine attached, engineer will apply brakes with 20 pound service reduction and leave them applied. Trainmen will then pass along train to determine that brake is applied on each car. Numbers of any cars found with inoperative air brakes must be reported on form 2809 and such cars assembled and switched to rear of train, next ahead of caboose, before leaving that station. After this inspection has been made, brakes have been released, and trainmen have noted that normal brake pipe pressure has been restored as indicated on caboose gauge, and have given signal to engineer, latter must comply with last part of Rule 11 to avoid brakes sticking from an overcharge of the brake system, etc.

If necessary to switch any cars to rear account brakes being inoperative, Rule 17 must be complied with before departure.

Rule 34 must be observed to determine by rolling inspection that each brake releases properly.

AIR BRAKE RULE 13.

At lay-over points for passenger equipment, where there are no car inspectors, crews must make air brake test before starting on initial trip, as follows: Brake pipe must be fully charged, engineer then apply air brake; trainmen must examine each car to see whether all brakes are applied. If all brakes apply, trainmen must give Signal 16 (e) from rear car, examine each car in train to see that all brakes release, and report condition to the engineer.

AIR BRAKE RULE 16.

Running air brake test shall be made:

M. P. 1488.85—Eastward and westward passenger trains.

Cabeza—Westward passenger trains.

AIR BRAKE RULE 17.

Rear end air brake test shall be made by freight and mixed trains immediately before leaving:

Sonoita.
Tombstone—Westward.
Ft. Huachuca—Westward.
South Siding.
Highrolls—Westward.
Cloudcroft—Westward.
Russia—Westward.
Walnut—Westward.
Indian Divide—Westward.
Medio—Westward.
Cabeza—Westward.
Mosquero—Westward.

AIR BRAKE RULE 56.

Passenger Trains

Retainer line must be coupled up and in use throughout entire train from Russia to Alamogordo.

Indian Divide to Walnut—All retainers.

Cabeza to Campana—All retainers.

Freight and Mixed Trains

Speed of freight trains will be reduced at points where trainmen are required to handle retainers.

Where retainers are used, speed of freight trains on any grade of over one per cent will not exceed 25 M. P. H., and on grades of this character, more than five miles long, for the first five miles the time consumed in traveling any one mile shall not be less than three minutes. This will not be authority to exceed specified speed restrictions.

Conductor and engineer after consulting may use necessary retainers on train of less than 100Ms per operative brake, when such train has loads on head end, or when it is necessary to adjust slack.

Ore trains between Don Luis and Douglas, handled by engines equipped with cross compound air compressor, will use fifty per cent of retainers Don Luis to Bisbee Junction. Trains, handled by engines not equipped with cross compound air compressor, will use all retainers Don Luis to Bisbee Junction and fifty per cent of retainers Bisbee Junction to Forrest.

Sufficient retainers will be used on Westward trains between Planeport and El Paso to adjust slack.

Russia to Alamogordo—Retainer line must be coupled up and in use throughout entire train.

Indian Divide to Walnut—Westward trains all retainers.

Cabeza to Campana—Westward trains all retainers.

When all retainers are not used, the required number shall be turned up solid on the head end of train.

The tonnage of freight or mixed trains between Russia and La Luz must not exceed 80Ms per operative brake, between Indian Divide and Walnut 120Ms per operative brake, and between Cabeza and Campana 160Ms per operative brake.

Fort Huachuca: Air brakes must be used in handling cars on elevated trestle.

Naco: Air brakes must be used when switching Naco pumping plant.

Forrest: Air brakes must be used on all cars in switching Paul's Spur.

Tucumcari: Air brakes must be used when switching pumphouse.

Dawson: Air brakes must be used on all cars moved from loading tipples to train yard and on cars moved from train yard to storage yards above tipples.

MISCELLANEOUS

1. In all cases where it is necessary to make a short move to reach water or fuel, including that required to spot second engine of doubleheader, engines of heavy freight trains must be cut off before spotting.

Westward trains must have sufficient water to make Tucson before passing last water tank east of Mescal, and not take water at Marsh or Rita except in emergency; then only enough to make Tucson.

Avoid taking water at the following emergency water stations:

Whetstone Hermanas Strauss Oscura
Hereford Mt. Riley Newman Montoya
Apache Akela

If necessary to take water, take only enough to make next water station.

Engines going to Don Luis must take full tank of water at Bisbee Junction.

Eastward trains take water at Guthrie; westward trains take only enough water at Clifton to reach Guthrie.

If necessary for eastward freight trains to take water between Vaughn and Tucumcari, take full tank at Pastura.

Eastward freight trains take full tank of water at Cuervo.

Promptly report to Chief Train Dispatcher any leak observed in water service pipeline between Carrizozo and Pastura.

At Cabeza take full tender of coal. If necessary to take coal at Taylor, engineer promptly advise amount taken and necessity for so doing.

Ash pans must be kept closed on coal burning engines while running. Dump cinders only at water columns or coaling stations, except in emergency. When dumped, enginemen must thoroughly wet and know that fire is extinguished, except where cindermen are on duty. If dumped where ties are exposed, must be shovelled from track, and must not be dumped close to coal chutes constructed of wood.

Cinders must not be dumped on switches or frogs.

4. One helper may be placed behind caboose if of steel underframe construction and cars ahead of caboose are not rear end cars; otherwise cut in ahead of twenty-five per cent of tonnage, or more if necessary to cut in ahead of all rear end cars; or if in opinion of conductor conditions are favorable helpers may be put on head end of train.

In no case will more than one helper engine be placed behind steel underframe caboose.

Helper must not couple to, or uncouple from train, while train is in motion.

When more than one engine is used on a train over Bridge 1205.01, over Gila River, at Guthrie, on Clifton Branch, engines must be spaced at least five car lengths apart.

When more than one engine is used on a train over bridges 1638.93 and 1740.80, Dawson Branch, engines must be spaced at least five car lengths apart or run single over these bridges.

4. (a) Pushing trains out of yards:

No engine will be placed behind a wooden underframe caboose or other wooden frame equipment.

Air will not be coupled through the pusher engine.

In no case shall the knuckle be removed, or closed, or cutting lever temporarily fastened in release position on a pusher engine, as means of preventing coupling being made.

Unless local conditions require, it will not be necessary to stop trains to detach pusher engines.

In no case will more than one pusher engine be placed behind steel underframe cabooses.

6. When necessary to turn at Toboggan, enter West leg of wye.

7. Within third rail territory of Clifton District, P. D. Co. trains must move with caution and be protected against Southern Pacific trains.

8. At points where engine is to be changed or cars set out or picked up on passenger trains, rear brakeman will open steam valve on rear of train at station one mile board and enginemen will shut off the steam one-half mile from station.

9. When openings have been made at highway crossings by trains on main track or siding, traffic must be protected against trains on other tracks.

When coupling to cars near a street or highway crossing not protected, a member of crew must protect street or highway traffic.

In performing work at stations, engines or cars must not stand on crossings.

Naco—Opening of five car lengths must be left each side of crossing east of passenger station.

Movements must be preceded by flagman over crossings at:

Curtiss... Apache Powder Co. plant.
Bisbee.... In vicinity of switchback near Phelps Dodge machine shop.
Calumet.. Phelps Dodge Smelter.
  Nos. 1 and 2 tracks.—No. 5 near office.—Lead to acid loading plant.—Lead to Calcine track.
Douglas.. Queen Track—All crossings.—Nacozari Lead—Park crossing, 14th Street.—16th Street (when crossing bell is inoperative).
El Paso... River Track:
  Dallas Street—Magoffin Avenue—Texas Street—East San Antonio Street—Myrtle Avenue—Bassett Avenue—T&P Crossing near Foundry.
  EP&NE Lead, East Yard:
    Any movement Westward.
  Movements to and from T&P via wye connection at Cotton Avenue.
  Dallas Street via Tower 47.
  All crossings North Campbell Street to West Main Street, inclusive, in case traffic light signals fail.
  If trains or engines are stopped and block street crossings, promptly communicate with Yardmaster.

Flashing light type crossing warning signals, operated by trains on main track No. 2, installed at Globe Mills crossing, El Paso, M.P. 1322.25. These signals not connected to Globe Mills siding or house track, and when using these two tracks, protect crossing with flagman.

10. Engines heavier than those shown herein will not be permitted to operate on following lines or tracks:

Benson-Fairbank Branch	C- 9

Patagonia Branch: E class with not more than 70,000 lbs. on drivers, T and Mogul class with not more than 100,000 lbs. on drivers, except T-1 class with not more than 112,000 lbs. on drivers may be used not to exceed 10 miles per hour over bridges 1051.96, 1055.29, 1067.41, 1085.15, 1097.49, 1097.95 TW and Consolidation class with not more than 125,000 lbs. on drivers.

Tombstone Branch	C- 9
Tombstone, Schuster Siding	TW
Lewis Springs, West leg of wye	C
Huachuca Branch	C- 9
Bisbee Branch:	
Don Luis-Bisbee	C- 9
Warren-Bisbee	C- 9
Holbrook Lumber Tracks	C-18
Shattuck Spur Tracks	C- 9
Gardner Mill Spur	C- 9
Briggs Spur Tracks	C- 9
Czar Loading Spur	C- 9
Oliver Mine Track	C- 9
Calumet, Trestle Work of tracks serving ore bins, Phelps Dodge Smelter	C-19
Douglas:	
Government Spur	C- 9
Brewery Tracks	C- 9
Gypsum Plant Tracks	C- 9
Clifton Branch, east of Lordsburg yard limits	MK-2-4
Valedon Branch	MK-2-4
Lordsburg, House and Transfer Tracks A. & N. M. Yard	C
Cloudcroft Branch	C-17
Capitan Branch	C-17
Tucumcari:	
Dawson Yard, including wye	C-19
Repair Tracks	C-19
Water Spur	C-19
Peco Spur	C-19
Coal Storage Tracks	C-19
Dawson Branch	MK- 9
Dawson:	
Spur to Phelps Dodge Merc. Co.	C-19
New Main Track beyond "Tipple" derail	C-19

Patagonia Branch: Cars weighing more than 169,000 lbs. gross must not be handled between N. M. & A. Jct. and Flux.

Tombstone Branch: Tombstone, Bunker Hill tracks must not be used beyond points indicated by signs: "Limit of Train Operation—End of Maintenance."

Bisbee Branch:

Campbell Shaft Track and Denn Spur Track must not be used beyond points indicated by signs: "Limit of Southern Pacific switching operations."

Lowell: Shop Spur in Junction Mine Yard, Engines must not pass sign reading: "Engines Must Not Pass This Point."

Engines must not be moved over coal hopper on coal track spur Bisbee Jct., Rodeo and Hachita, or coal track, Columbus.

Clifton Branch: Tunnels between Milepost 1212.1 and 1214.5 are numbered 1 to 6, commencing at Clifton. Approach Tunnel 6 with caution.

Strauss: Engines must not use curved portion of either leg of wye tracks, except engines may use that part of west leg of wye to pick up or spot cars at unloading box west of pumphouse.

El Paso: Old T. & N. O. eastward main track must not be used between ice house crossover and turnout to westward main track No. 1 near Rio Grande River Bridge.

East leg of Pacific Lines wye connecting Alamogordo Subdivision main track with roundhouse lead at El Paso cannot be used by engines with rigid wheel base exceeding 15 ft. 8 inches and equipped with tenders not larger than capacity of 7000 gals. of water.

Alamogordo:

Breece Lumber Co. lead	C- 9
Wood Spur (track No. 119) connected into Tie Treating Plant lead (track No. 111) with switch on North side of log pond	C-17

Cloudcroft Branch: All cars handled between Alamogordo Jct. and Russia must be equipped with independent retainer line; have 3 inches of lateral in end sills on each side of coupler shank; equipped with inside connected brakes, and hand brakes in working condition. Air and hand brakes must work together. Cars more than 42 feet in length outside measurement or 14 feet 6 inches in height from top of rail, or equipped with trucks having more than four wheels, cannot be handled between La Luz and Russia.

Hotel: Engines may use Southwest Lumber Company's track, which extends east out of Cloudcroft Branch at M.P. 1409.5, for distance of 1450 feet from initial switch, also the siding within these limits. End of Southern Pacific operation over this track designated by sign reading: "End of S. P. Operation."

A. A. R. ruling must be observed covering height of loads in open top cars.

Capitan Branch: All cars handled between Carrizozo Jct. and Capitan must have 3 inches of lateral in end sills on each side of coupler shank, equipped with inside connected brakes, and hand brakes in working condition. Air and hand brakes must work together. Cars more than 60 feet in length outside measurement or with trucks having more than four wheels, will not be handled.

Hawks: Engines must not use New Mexico Construction Company's industry track beyond sign reading: "Engines do not pass this point"; or on siding beyond sign reading: "Railroad employes must not move engines through this switch."

Reduce speed and look out for fallen rocks on curve between Mile Posts 1053.5 and 1053.8, west of Charleston.

Look out for drifted sand between Columbus and Rio Grande Tunnel.

Reduce speed and look out for caving banks both approaches Rio Grande Tunnel.

Look out for drifted sand between Deming and Anapra, Planeport and Alvarado, Turquoise and Paxton, and switches at Temporal and Robsart; and for fallen rocks and trees during or after rains or thaws between Arabella and Pintado, and Santa Rosa and Hawks.

Look out for fallen rocks and trees between La Luz and Russia, and between Walnut and Coalora.

Dawson Branch:

Look out for drifted sand between Tucumcari and Canadian and between Abbott and Colfax, and fallen rocks and trees between Canadian and Cabeza.

Westward trains from Cabeza to Campana must not handle more than 40 freight cars in one train and must not follow each other closer than fifteen minutes.

11. Tracks between Tucson and Mescal numbered and will be used as follows:

No. 1, Westward Trains.
No. 2, Eastward Trains. (See Tucson Division time table.)

Tracks between Anapra and El Paso (Octavia St.) numbered and will be used as follows:

No. 1, (Octavia St. Pacific Lines) Westward Trains.
No. 2, Eastward Trains (Octavia St. T&NO Yard.)

Eastward trains may detour through ice house crossover to Tower 6, then to El Paso Union Passenger Depot or to (Octavia St.) T&NO Yard.

Westward trains departing El Paso Union Passenger Depot will reach track No. 1 through interlocking plant Tower 6.

Eastward trains arriving may reach El Paso Union Passenger Depot through interlocking plant Tower 6.

Tracks between Tower 6 and Tower 47 identified and numbered, and will be used jointly by trains of the T&NO and Pacific Lines, as follows:

T&NO No. 1, (North Track) Tower 47 to El Paso Union Passenger Depot connection or Tower 6, Westward Trains.

T&NO No. 2, (South Track) Tower 6 or El Paso Union Passenger Depot connection to Tower 47, Eastward Trains.

14. Passenger engineers will make additional water stops to use sprinklers properly in dusty territory, where engines clean fires, or where track has been disturbed.

20. Handling of freight cars in trains behind passenger cars carrying passengers prohibited.

Baggage, express, mail, refrigerators or other head end cars must not be handled on rear of passenger trains unless trainmen can pass through them.

The term "freight car" does not include a baggage, express or mail car, or a caboose.

Except as specifically authorized, no car containing passengers is to be hauled next to locomotive of a steam passenger train. A steel combination or partitioned car may be hauled with baggage or unoccupied end next to locomotive.

Passenger equipment, (except official cars) moved in freight trains, must be placed next to caboose if rear end freight cars in train will permit.

25. Electric lanterns may be used for displaying white light only.

28. Bus connection is provided at Bisbee Jct. and conductors will ascertain if bus has arrived or secure instructions if they are to wait.

SPECIAL INSTRUCTIONS

SPEED RESTRICTIONS

Maximum speed of any passenger train must not exceed 50 miles per hour except as otherwise provided for.
Maximum speed of any freight or mixed train must not exceed 35 miles per hour except as otherwise provided for.
Speed Restrictions in Miles Per Hour, Will Apply as Follows:

"Mt", "P", "E", "A", "GS", AND "T" 26, 32, 37, 40, ENGINES IN PASSENGER SERVICE MAY MAKE MAXIMUM SPEED

SPEED OF TRAINS REGULATED BY ORDINANCE THROUGH CITY LIMITS

PAGE	LOCATION	M. P. H.
4	Deming	8
4, 5	El Paso, over all street crossings except	
	North Campbell to West Main Streets, inclusive	10
	North Campbell to West Main Streets, inclusive	15

El Paso: Trains must approach junction switches of icehouse crossover with caution.

Trains entering or leaving El Paso Union Passenger Depot will do so with caution.

Westward trains and yard engines on Pacific Lines Tracks Nos. 1 and 2 must not exceed speed of 6 miles per hour over North Campbell Street.

Speed restrictions for engines are shown in speed restriction table; however, following are maximum speeds at which tenders may be operated, subject to restrictions imposed locally:

Description	Maximum Speed
Having water capacity 7,000 gals. or less, except Classes 70-R-1 and 70-SC-1	50 MPH
Having water capacity in excess of 7,000 gals. and including Classes 70-R-1 and 70-SC-1	Same as Engine Speeds

Engines operated coupled tender to tender must not exceed speed permitted engines running backward.

Maximum speed of disabled engines, except S or SE class, hauled in train, or running under own steam, must not exceed:

When pilot removed	20 M. P. H.
When main rod only removed	30 M. P. H.
When side rod only removed	30 M. P. H.
When both main and side rods removed	20 M. P. H.
When hauled in train, all rods on	30 M. P. H.
SP 1, 2 and 3 when inside main rod removed	30 M. P. H.
S and SE engines, and all other classes of engines when not equipped with engine trucks	20 M. P. H.

When any weight has been removed from any one pair drivers on an engine, speed must not exceed 20 M. P. H.

When any weight has been removed from one wheel of any pair drivers on an engine, speed must not exceed 30 M. P. H.

Yard engines in service must not exceed 20 miles per hour.

Maximum speed moving cars ahead of engine, 20 miles per hour.

Trains consisting of engine and caboose only should be considered freight trains and speed restricted accordingly.

Trains handling loaded ore cars between Bisbee Jct. and Calumet must not exceed 25 miles per hour.

Trains handling logs loaded on flat or logging cars.......25 M. P. H.

Trains handling relief outfit with steam derrick must not exceed 25 miles per hour.

Trains handling piledrivers, locomotive cranes, or industrial cranes, with boom in place, must not exceed 25 miles per hour on straight track or 15 miles per hour around curves of 4 degrees or over.

Trains handling rotary snow plows must not exceed 15 miles per hour.

Cars moved in passenger trains must be equipped with steel-tired or all-steel wheels.

Wooden passenger-carrying cars, wooden baggage, express, and other head-end cars, unless equipped with steel center sills and steel platforms, must not be used in passenger service except on authority of Superintendent.

Speed of trains handling such cars must be restricted as follows:

When consist includes not more than three wooden passenger-carrying cars, maximum speed must not exceed 50 miles per hour.

When consist includes more than three wooden passenger-carrying cars, maximum speed must not exceed 40 miles per hour.

If consist of train includes both wooden and steel passenger-carrying cars, the wooden cars must be kept together and handled on the rear.

SPECIAL INSTRUCTIONS

LOCATION OF OVERHEAD AND SIDE STRUCTURES NOT STANDARD CLEARANCE

Employes are warned that it is dangerous to stand erect on top of cars, or to ride on sides of cars while passing these points, and that they must protect themselves from injury.

Bulletins may be issued from time to time referring to impaired clearances not listed below.
